COURSE IN THE HOSPITAL AND DISCUSSION:

Child was admitted with above mentioned complaints and shifted to PICU for further management, ventilatory support was continued and Oral antibiotic started along with I.V fluids. Investigations sent were: (CRP -Neg, TLC-normal, along with urine R/M: 8-10pus cells, bacteria+), USG KUB s/o left kidney nephrocalcinosis. USG Lower limb doppler was normal (no DVT visualised). Nephrology consultation was done; child was advised for continuation of oral antibiotic prophylaxis. Pediatric surgery consult was taken: resolution of previous hydronephrosis was noted and advised to continue antibiotic prophylaxis for pyuria. Further evaluation was planned in case of high grade fever, increasing pyuria. Neurosurgery review was done: CT head and neck was advised and done. Continuation of conservative management was advised.

Fever remained low grade and gradually reduced. Patient remained hemodynamically stable, tolerating NG feeds, passing urine adequately with no respiratory distress. TT secretions were thin, mucoid.

Parents were explained and reiterated in detail on tracheostomy and ventilation care and suctioning methods.

Currently the patient is on portable ventilator on SIMV / PSV mode with TV of 40ml (PS 11), PEEP of 5 and rate of 22. FiO2 40%. He is afebrile, HR 110/min, PPWF, spO2- 100%, CRT < 3s, BP- 98/ 62 mm Hg, TT changed on 18/7/2025, TT site healthy.

Parents have been explained in detail regarding need for prolonged ventilation in view of persisting quadriparesis and they understand the risks involved in home care.

Patient is being discharged on portable ventilator support for home care. Attendants have been explained in detail about the danger signs and need for urgent referral to ER.

PROGNOSIS ON DISCHARGE:

Guarded, prolonged ventilator dependence

DIET RECOMENDATION:

RT Aptamil Gold 2 - 100 ml 3rd hrly, 3 scoops

PHYSICAL ACTIVITY:

Continued continuous Nursing care at home as patient is ventilator dependent with TT in situ

DISCHARGE MEDICATION:

Sl. No	Drug Name	Dose	Schedule	Duration	Start Date	End Date	Days	Instructions
1	PARACETAMOL(125 mg/5ml)Suspension	5 mL	Stat	1 Dose(s)	12/09/2025	12/09/2025		at the time of fever > 100 F
2	Cholecalciferol(800 IU)Drops	0.5 mL	1-0-0	1 Month(s)	13/09/2025	12/10/2025

Advice
 Continued continuous nursing care at home, as patient is ventilator dependent, risk to life explained
 Detail, danger signs explained
 ICU Helpline 9289654093
 To collect urine C/S report
 To review in case of high grade fever, pyuria
 To review in ENT OPD after 15 days
 To review in Neurosurgery OPD for cervical brace.

FOLLOW-UP INSTRUCTIONS:

To review in Critical care paediatric OPD after 3 days with urine c/s report with prior appointment Dr.
 Anand/ Dr. Veena/ Dr. Dharendra Pratap Singh.
 In case of fever, pain or any other complaint please reach out to us at 0129-2851234.
 In case of any emergency please reach out to us on 0129-2851234.*

RESULT REPORT

Findings

Post-op changes in Cervicovertebral junction region.

Mild atrophy in bilateral frontal and temporal lobes.

Metallic streak artifact is noted at and around Cervicovertebral junction.

Rest of the cerebral parenchyma is normal in density with preserved grey-white differentiation.

Bilateral basal ganglia and thalami are normal.

Bilateral lateral ventricles and third ventricle are normal.

Posterior fossa structures including brainstem, cerebellum and fourth ventricle are normal.

Sellar and parasellar structures are normal.

No significant interval changes as compared to previous scan dated 11/04/2025.

Please correlate clinically.
